Join us in 2021! - January 6 @ 1 PM!

"Electric Motors and Shaft Currents"

This webinar will cover:

- I have an "XYZ" brand variable frequency drive so it will not create shaft-currents.
- Developing shaft-current damage is rare, right?
- How long does it take to damage bearings?
- Observing shaft-current damage? What causes shaft-currents?
- Is my new VFD duty motor immune from these currents? If these currents occur, are they covered by the motor warranty
- Methods to address shaft-currents?

Presented by:
Kent Henry - Reliability Specialist
